Help Desk Portfolio

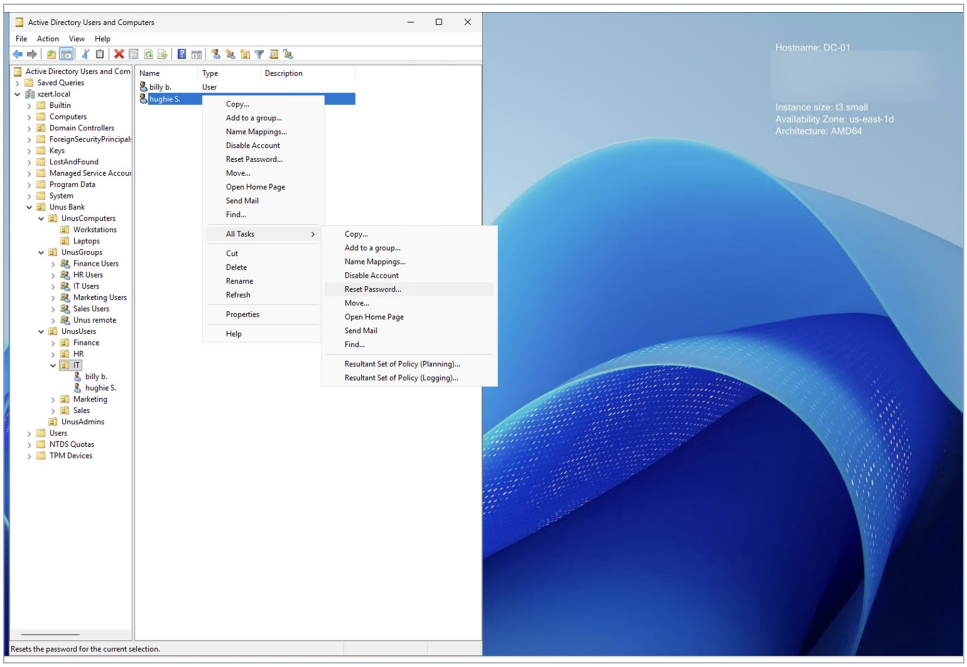

Trez’Juan Stevenson | Oklahoma City, OK | (405) 706-3025 | Trezjuanstevenson26@gmail.com

Companion to my one-page resume. Each exhibit below supports a specific resume statement. All users, tickets, and companies shown are lab or simulation data.

Exhibit	Supports resume section	Page
A. AWS Active Directory Home Lab	Technical Projects: AWS Active Directory Home Lab	1–2
B. Windows VM Home Lab	Technical Projects: Windows VM Home Lab	3
C. ServiceDesk Simulator Tickets	Technical Projects: Service Desk Ticket Practice	4–5
D. Resolution Notes, INC431573	Technical Projects: MFA reset and ticket documentation	5
E. TryHackMe Certificate	Certifications & Training	6

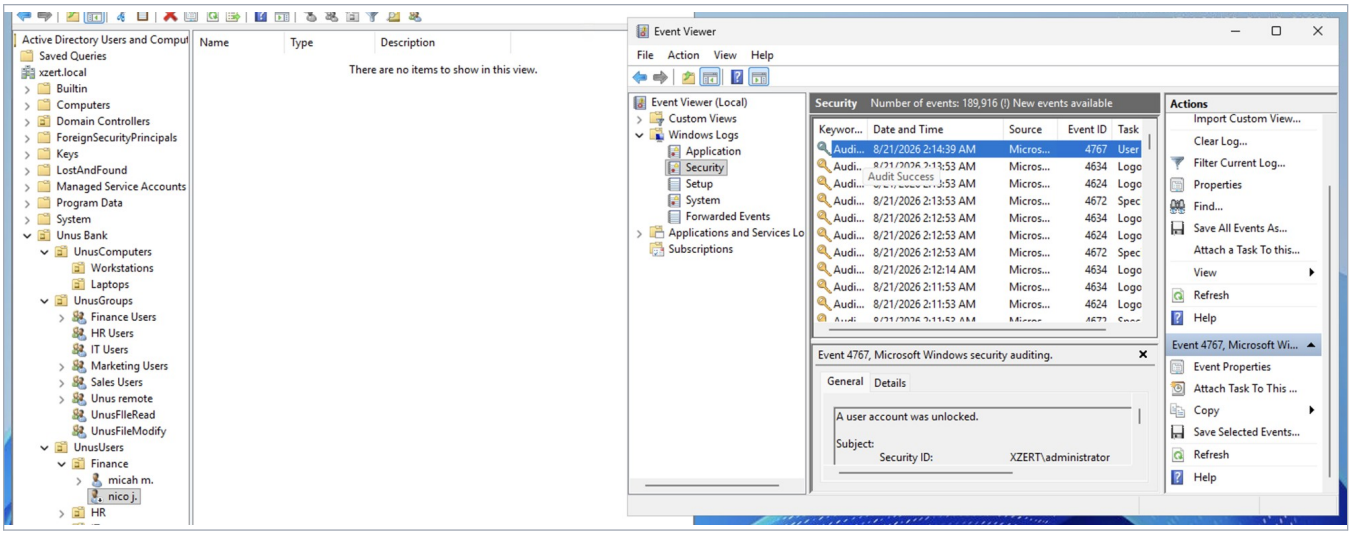

Exhibit A: AWS Active Directory Home Lab

Resume section: Technical Projects: AWS Active Directory Home Lab
Resume statement: Built an AWS-hosted Active Directory lab with departmental organizational units and Group Policy; practiced user administration in ADUC and verified an account unlock in Windows Security Event Viewer (Event ID 4767).

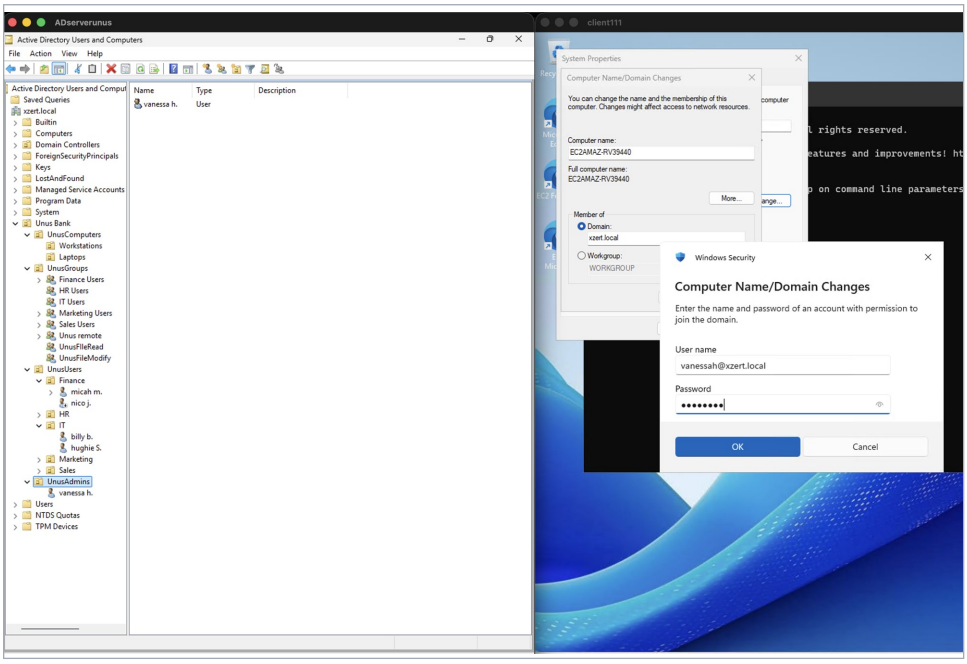

A1. Domain controller DC-01 on AWS with department OUs

Active Directory Users and Computers in the lab domain. The “Unus Bank” tree separates computers, groups, and users by Finance, HR, IT, Marketing, and Sales; the menu shows Reset Password. Instance network details are blurred.

A2. Account unlock verified in Event Viewer

Security log Event ID 4767 (“A user account was unlocked”) shows the administrator action after the account was unlocked in Active Directory.

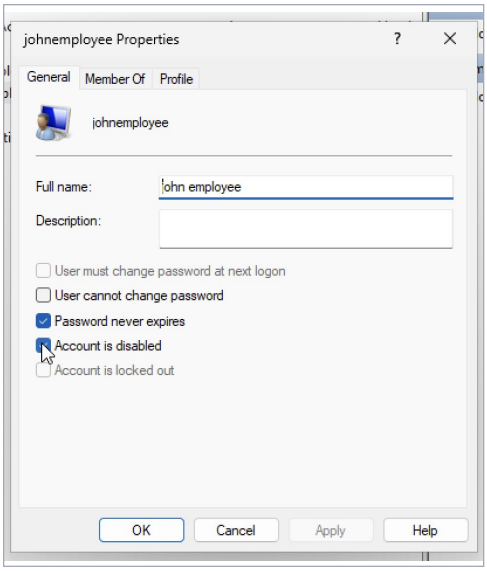

A3. Windows client joined to the lab domain

Client joined to xzert.local with an account from the UnusAdmins OU; the OU structure is visible in Active Directory on the left.

Exhibit B: Windows VM Home Lab

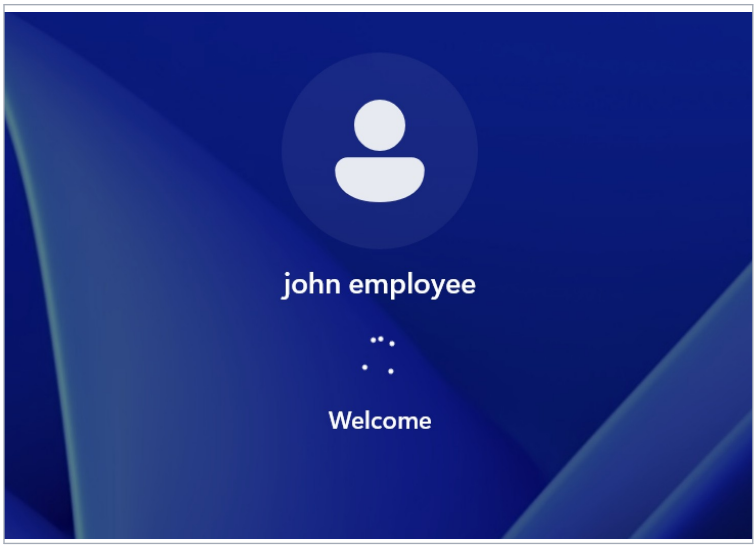

Resume section: Technical Projects: Windows VM Home Lab
Resume statement: Created and managed local users in a Windows VM; diagnosed a simulated login failure caused by a disabled account, re-enabled it, and verified that sign-in succeeded.

Ticket SD-001, cannot log in. Issue: user could not sign in. Finding: the account was disabled. Action: re-enabled the account and asked the user to retry. Resolution: user confirmed sign-in; incident resolved.

B1. Diagnosis

"Account is disabled" checked for the user.

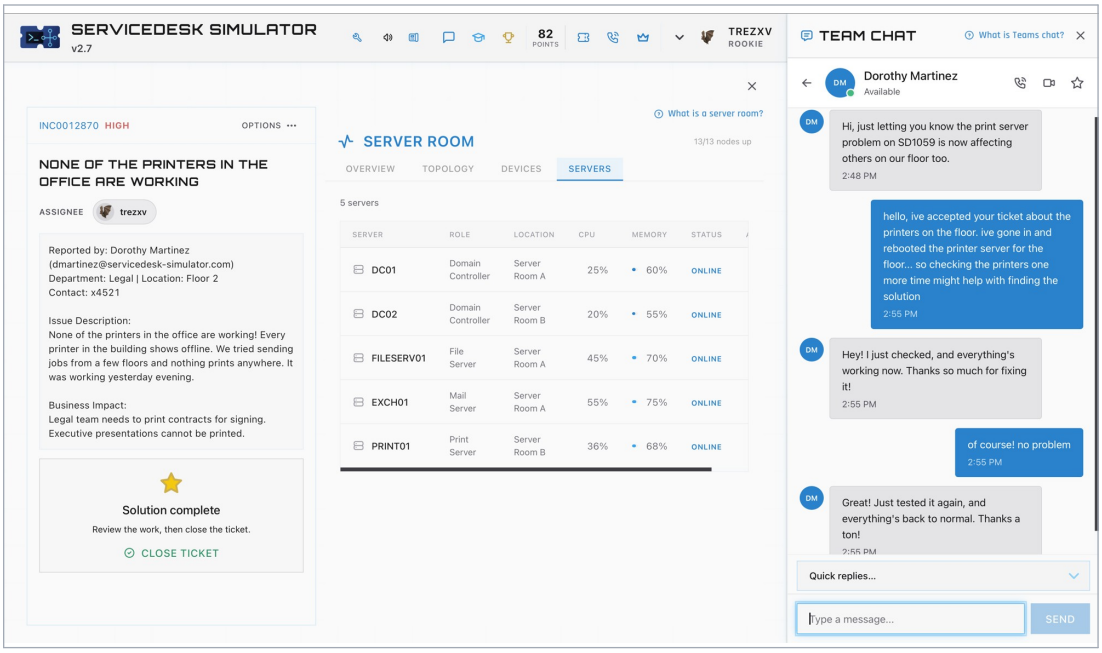

B2. Resolution

Sign-in succeeds after the account was re-enabled.

Exhibit C: ServiceDesk Simulator Tickets

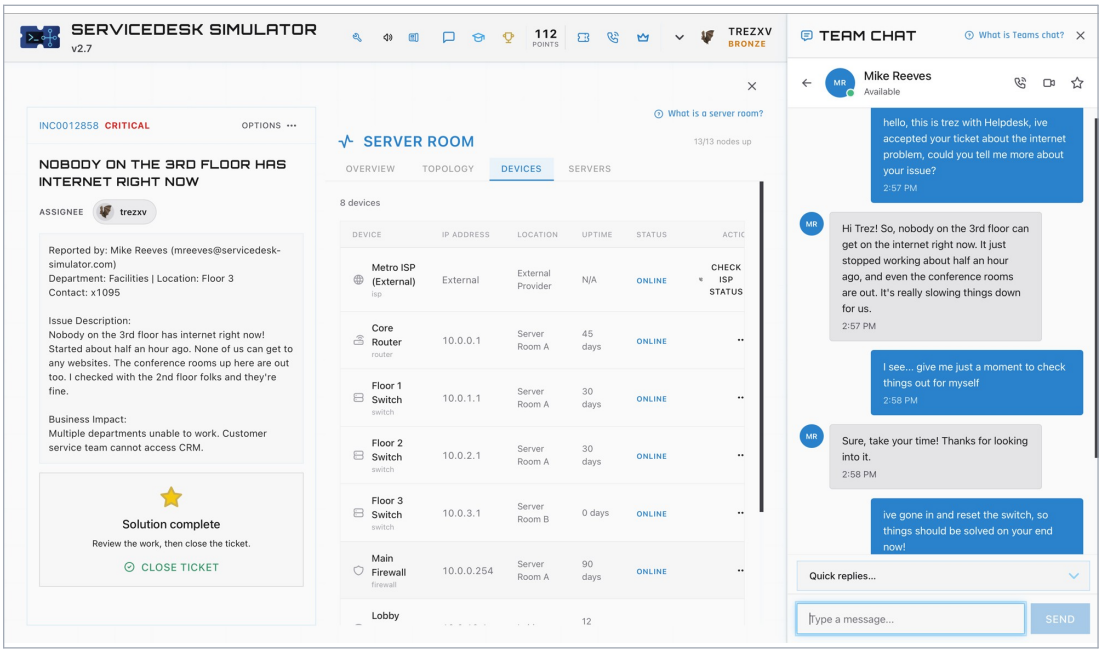

Resume section: Technical Projects: Service Desk Ticket Practice

Resume statement: Resolved simulated ServiceDesk Simulator tickets involving printer outages, a Floor 3 connectivity outage, and MFA failure by checking system status, resetting MFA after identity verification, and confirming service restoration with users.

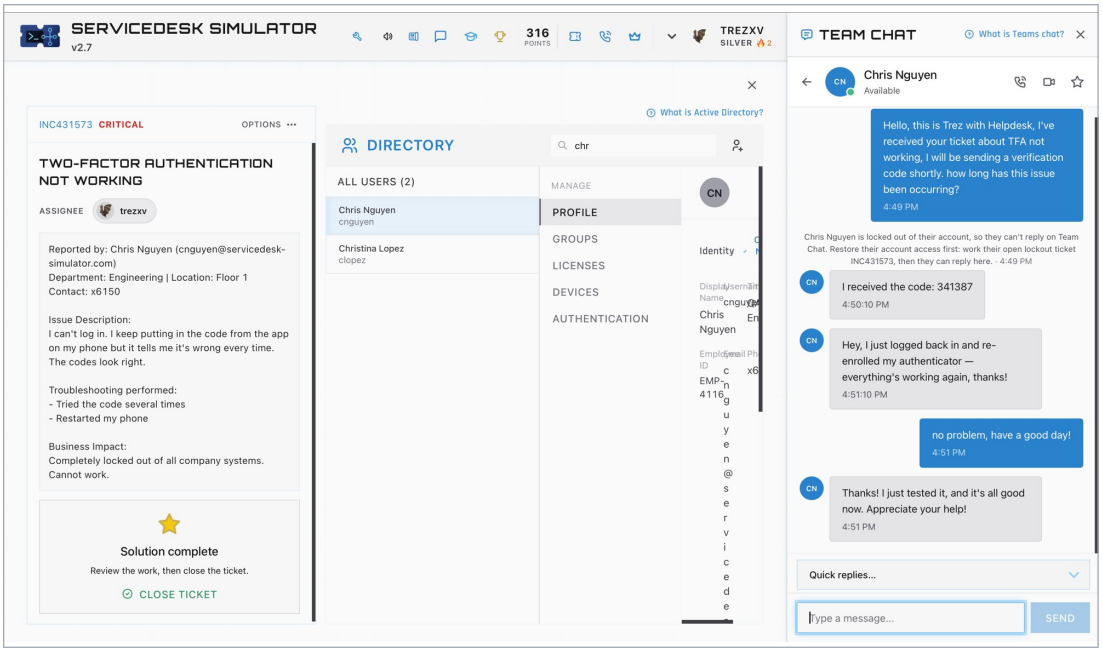

C1. INC0012870: Printers offline (High)

Print server PRINT01 was degraded (95% CPU) before the fix. After rebooting it, the server room shows PRINT01 Online at 36% CPU, and the user confirmed printing worked.

C2. INC0012858: Floor 3 internet outage (Critical)

The Floor 3 switch was in an error state before the fix. After resetting it, the device list shows it Online with 0 days uptime, and the user was told connectivity should be restored.

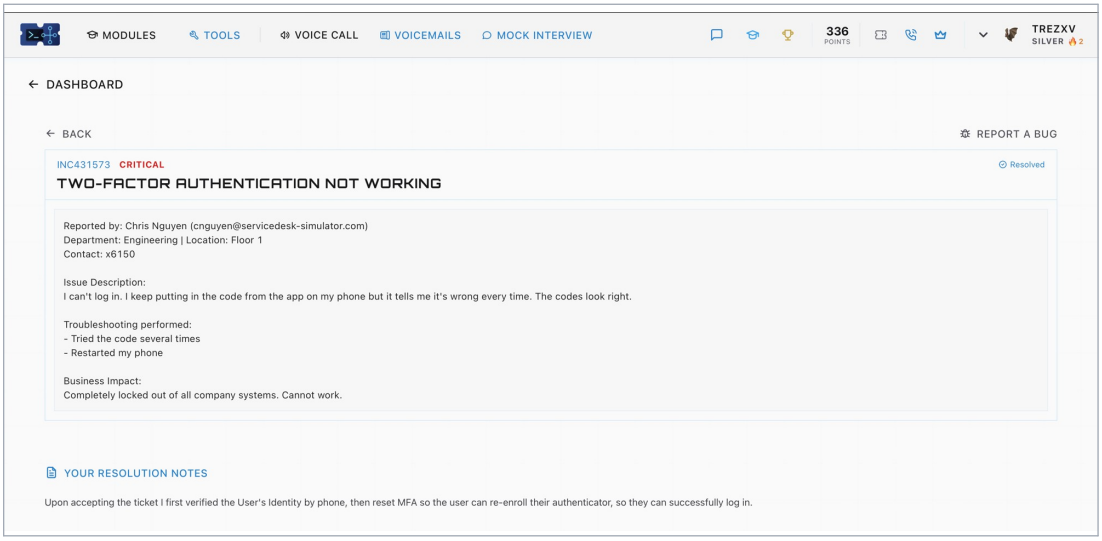

C3. INC431573: Two-factor authentication failure (Critical)

Contacted the user, verified their identity, and reset MFA. The user re-enrolled their authenticator and confirmed everything worked.

Exhibit D: Resolution Notes for INC431573

Resume section: Technical Projects: Service Desk Ticket Practice (ticket documentation)
Resume statement: Practiced user communication and ticket documentation.

D1. Written resolution notes

Verified the user's identity by phone, reset MFA, and guided the user through authenticator re-enrollment; the user confirmed successful sign-in.

Exhibit E: TryHackMe Cyber Security 101

Resume section: Certifications & Training
Resume statement: TryHackMe Cyber Security 101 — Certificate of Completion | Dec 2025 | 45 hours 23 minutes

E1. Certificate of Completion

TryHackMe Cyber Security 101 Learning Path, completed December 31, 2025; course duration 45 hours 23 minutes; credential ID THM-Y3T0AJXUYO.
